2024 WILL MARK 36 YEARS IN BUSINESS FOR CARLSON'S CHOKE TUBES.

For the last 36 years, we have been able to grow and improve our line of choke tubes. This has come from patterning tens of thousands of shells and using all different makes and models of shotguns.

By examining patterns and making adjustments to things such as the parallel section, finish, and diameters, we are able to provide an affordable product that performs as you would expect in the field and at the range.

Over the last few years we have grown our product line and some of this can be attributed to the Electronic Patterning Board (EPB) that we have at our disposal. This technology allows us to see various things such as point of impact (POI), pattern percentage, and pattern density. Using our EPB, we are able to get more accurate data than by doing this manually. This advantage is passed on to the customer by allowing us to design better choke tubes and gives our techs more information to pass along to our customers.

We pride ourselves on our customer service and encourage customers to contact us any time they have a concern or question. We back our product with a lifetime warranty! With all of this experience and technology, there are still unforeseen variables, which is why we stress that the customer pattern his or her gun to know exactly how the gun will perform using a specific load and choke combination. You don't go deer hunting without sighting-in your rifle and scope, and we suggest using the same line of thinking with your shotguns. Be certain to pattern your shotgun with the load and choke tube you plan to use before you use it in the field.

The team at Carlson's Choke Tubes tests thousands of shotgun shells and choke tube combinations each year. This testing allows us to offer you the best possible performance, both on the range and in the field.

PATTERNING & IMPORTANT
CHOKE TUBE INFORMATION

CARLSON'S CHOKE TUBES are made from hardened 17-4 stainless steel with a Rockwell Hardness of 43 and on the Rockwell 15-N scale 82. This allows us to build choke tubes that you can shoot steel shot in a full choke constriction. When shooting steel shot, always shoot a more open choke than with lead because steel patterns are tighter at the same distance than lead shot.

LEAD vs. STEEL

Steel shot will pattern tighter, use the following guide:

SHOOTING THIS CHOKE WITH LEAD	WILL PATTERN LIKE THIS CHOKE WITH STEEL
Skeet Choke	Improved Cylinder Choke
Improved Cylinder Choke	Modified Choke
Modified Choke	Full Choke

TST TRIPLE SHOT TECHNOLOGY

TST is a series of three graduated rings in the taper section of the choke tube that allows for a more gradual transition from the shotgun's bore to the final constriction/parallel section of the choke tube.

AVAILABLE IN PORTED AND NON-PORTED

These chokes feature our brand-new Triple Shot Technology. TST is a series of three graduated rings in the taper section of the choke tube, which allows for a more gradual transition from the shotgun bore to the final constriction. The Cremator® series conveys a host of benefits to the shooter, like reduced pellet deformation, fewer flyers, and denser patterns. You also get all the benefits of an extended choke tube, including a 25% longer

parallel section for tighter and more dense patterns, wrench-less installation/quick removal, and muzzle protection. They are offered in your choice of ported or non-ported configurations with a matte black finish. Like all of our choke tubes, the Cremator® series carries a lifetime warranty and is constructed out of our premium 17-4 stainless steel.

CREMATOR® WATERFOWL 2-PACK

The Cremator® 2-Pack set comes with both Mid-Range & Long-Range choke tubes and a free universal choke wrench. This combination allows the shooter to purchase both the MR and LR chokes at a discounted price. The Mid-Range choke is excellent for a shooting distance of 20-40 yards and the Long-Range is best used for shooting beyond 40 yards. The NEW line of Cremator® choke tubes features our TST technology and the ability to shoot any lead, steel, Bismuth, TSS or Hevi-Shot load regardless of size or speed. These chokes come backed by Carlson's Lifetime Warranty!

NEW

BISMUTH BONE BUSTER

Our new Bismuth Bone Buster choke tubes are designed to produce excellent, dense patterns with all Bismuth ammunition. CNC precision machining from 17-4 heat-treated stainless steel featuring a longer parallel section (inside the choke) over conventional factory choke tubes. Combine this with extensive testing with various loads and you have the perfect choke to deliver devastating patterns with Bismuth! Available in Mid-Range (IM) and Extended-Range (EF). The Bismuth chokes can be used with all lead and Hevi-Shot loads. The Mid-Range choke tube can be used with all steel shot while the Extended-Range choke tube can be used with all steel shot not larger than #2. Experience the Bone Crushing dense patterns with these NEW Bismuth Choke Tubes. These chokes come with Carlson's Lifetime Warranty!

FEDERAL PREMIUM

BLACK CLOUD CHOKES

Federal's Black Cloud™ ammunition features devastating penetration, which can now be delivered with unique features that help downrange performance and increase hunter success. The Black Cloud Choke Tube is constructed with a titanium-coated stainless steel and comes in Mid-Range and Long-Range Models. The titanium coating helps the uniquely designed New Flex and FliteControl Wad in the Black Cloud™ ammunition perform downrange with less build-up in the choke and allows the Flitestopper shot to do its job, thus increasing your take in the field.

These chokes are specifically designed to get the most performance from Federal's new Black Cloud Ammunition, but they perform extremely well with other steel shotshells. The Long-Range choke tube should not be used with any steel shot larger than BB or with any steel shot faster than 1550 fps. The Mid-Range model can be used with all steel shot sizes. Black Cloud™ ammunition has been designed to be used with choke tubes that do not use porting or wad-stopping devices. This choke is backed by Carlson's Lifetime Warranty.

SNOW GOOSE CREMATOR

Snow Goose Cremator® Choke Tubes feature a white Cerakote finish. The Cerakote finish offers an industry-leading corrosion, abrasion, and chemical-resistant protective coating that results in longer product lifespan with a low-glare custom look.

Snow Goose Cremator® Choke Tubes feature our brand-new Triple Shot Technology and are offered in mid and long-range constrictions. TST is a series of three graduated rings in the taper section of the choke tube, which allows a more gradual transition from the shotgun bore to the final constriction. The Cremator series conveys a host of benefits to the shooter, like reduced pellet deformation, fewer flyers, and denser patterns.

The Cremator® series has no size or speed restrictions, allowing steel shot in any of the three constrictions. You also get all the benefits of an extended choke tube, including a 25% longer parallel section for tighter and more dense patterns, wrench-less installation, quick removal, and muzzle protection. They are offered in your choice of ported or non-porting configurations. The Cremator® series carries a lifetime warranty and is constructed out of our premium 17-4 stainless steel.

NOTE: Remington Pro Bore & Optima HP Long-Range Choke Tubes: DO NOT USE steel shot larger than #2. Pro Bore Chokes have 2 rings, not 3.

FEDERAL  **PREMIUM**

DELTA WATERFOWL CHOKES

Our entire line of steel shot choke tubes pattern steel shot extremely well. These choke tubes feature a longer parallel section, allowing for fewer flyers and denser patterns. These choke tubes extend 3/4" outside the barrel, eliminating damage to your barrel caused by prolonged steel shot use. The longer parallel section allows for use of larger steel shot in tighter choke constrictions. They are made of 17-4 stainless steel with a knurled extension and a matte black finish. Each choke tube carries a lifetime warranty.

Close-Range Delta Waterfowl Choke Tubes, for hunting over decoys, perform best in situations up to 35 yards. Mid-Range Delta Waterfowl Choke Tubes are best for those situations where you are shooting 25 to 50 yards. Long-Range Delta Waterfowl Choke Tubes perform best when taking shots 40 yards and up and are also a good choice for the varmint hunter using larger-size shots. No steel shot bigger than BB or faster than 1550 FPS should be used through the full or long-range choke tube. A portion of all sales go to help Delta with waterfowl conservation.

2-PACK DELTA WATERFOWL CHOKE SETS

GREAT PATTERNS WHILE DONATING BACK TO CONSERVATION

Our Delta Waterfowl Choke Tubes are manufactured from 17-4 stainless steel and are designed to throw tighter and denser patterns than conventional choke tubes. These choke tubes feature a 25% longer parallel section in the choke, thus throwing more consistent patterns. Each choke tube is knurled on the end to allow for quick and easy removal. Each choke tube has the constriction and type laser-marked on the end and body for easy reference.

Steel shot may be used through these choke tubes with exceptional results. Do not shoot steel shot larger than BB or any steel load faster than 1550 FPS through the Long-Range Constriction. Loads that exceed this size and speed should be used with the Mid-Range choke tube. These chokes are backed by Carlson's lifetime warranty.

NOTE: Remington Pro Bore Long-Range Choke Tubes: DO NOT USE steel shot larger than #2.

12 & 20 GA DELTA WATERFOWL CHOKE SET

Our Delta Waterfowl Choke Tubes are manufactured from 17-4 heat-treated stainless steel and designed to throw tighter and denser patterns than conventional choke tubes. These choke tubes feature a 25% longer parallel section in the choke, thus throwing more consistent patterns. Each choke tube is knurled on the end to allow for quick and easy removal. Each choke tube has the constriction and type laser-marked on the end and body for easy reference.

PLEASE NOTE: Our Close-Range and Mid-Range choke tubes can be used with all steel shot ammunition. The Long-Range choke tube should not be used with any steel shot size larger than BB or with any steel shot faster than 1550 fps.

*NOTE: Remington Pro Bore Long Range Choke Tubes: DO NOT USE steel shot larger than #2. Optima HP Mid & Long-Range are made with Carpenter 455 Steel

BLIND SIDE® WATERFOWL CHOKE TUBES

Carlson's Blind Side® Choke Tubes allow Winchester® Blind Side® HEX™ Steel Shot and Diamond Cut Wad to do its job and helps deliver devastating downrange patterns. This choke tube performs equally well when used with other steel shot loads. Carlson's Blind Side® Choke Tube is a proven performer on waterfowl using all steel shot loads over extended distances. This choke is also designed to shoot lead, plated copper and nickel shot, as well as all Hevi-Shot® ammunition with great results.

PLEASE NOTE: Our Mid-Range Choke Tubes can be used with all steel shot ammunition. The Extended-Range Choke Tube should not be used with any steel shot larger than BB or with any steel shot faster than 1550 fps.

HEAVYWEIGHT® TSS

Carlson's TSS Turkey Choke Tubes are optimized for Federal Premium® Heavyweight® TSS Turkey Loads but also work exceptionally well with other manufacturers' turkey ammunition (smaller shot size 7-9). The Federal Premium's Heavyweight TSS Turkey Load has an incredibly high pellet count in both 7 and 9 shot. Combining this with the ability to carry energy further makes them ideal for 12ga, 20ga, & .410 shotguns. Tungsten Super Shot (TSS) has a 22% heavier density than heavyweight shot and a 56% heavier density than traditional lead shot. It puts the maximum amount of pellets possible in a 10" circle at 40 yards. The 12ga, 20ga, and .410 shells will include the FliteControl Flex™ wad that gives hunters the ability to shoot any choke tube they prefer. Long-range turkeys don't stand a chance.

LONG BEARD™ XR LOK'D & LETHAL™

Our Long Beard™ XR Choke Tube is manufactured from 17-4 stainless steel and has been specially designed to produce the best patterns when shooting Winchester's New Long Beard™ XR Turkey loads. This new ammunition features Shot-Lok™ Technology that allows for the tightest patterns and longer downrange reach over any turkey load on the market. Pair this ammunition's capabilities with the new Carlson's Long Beard™ XR Turkey Choke and you have a devastating, gobble-killing combination. This choke tube features a 25% longer parallel section, thus throwing tighter and denser patterns downrange.

Can be used with any turkey load sizes 4-10. Rated for TSS shot sizes 7-10.

TST

TRIPLE SHOT TECHNOLOGY

- Fewer flyers
- Denser patterns
- Reduced pellet deformation
- See page 3 for cutaway of TST

CARLSON'S PERFORMANCE PORTED TURKEY CHOKE TUBES

Designed for the serious turkey hunter, each Super Full Choke has been specifically bored to throw the optimum pattern at short and long distances. Each choke is ported, allowing gases to escape quickly and reducing recoil and muzzle jump in the process. Each choke tube is manufactured from 17-4 stainless steel and has a matte black, non-reflective finish. Backed by our lifetime warranty.

12 GA PORTED TURKEY CHOKE TUBES

NOTE: Carlson's Turkey Choke Tubes can shoot steel shot no larger than #4.

TSS Turkey loads (sizes 7-10) may be used in all of our turkey chokes.

Carlson's Bone Collector™ Turkey Choke Tubes are designed to throw tighter and denser patterns, and at longer distances, than conventional choke tubes. Each choke is manufactured with a longer parallel section, constricting shot gradually with few deformed pellets and resulting in tighter, denser patterns. These choke tubes have a non-reflective matte black finish and are manufactured from 17-4 heat-treated stainless steel. Our turkey chokes are designed to handle all lead, nickle-plated, copper-plated, Bismuth, Tungsten, Hevi-Shot, TSS, and steel turkey loads smaller than #4. Each choke tube constriction has been pattern tested and has thrown the best patterns with 4 through 10 shot.

Can be used with any turkey load sizes 4-10. Rated for TSS shot sizes 7-10.

TURKEY CHOKE TUBES

Carlson's Extended Turkey Chokes are designed to shoot all lead and Hevi-Shot loads. These chokes feature a knurled end (approximately 3/4") and a 25% longer parallel section to help produce very tight/dense patterns that stop gobblers dead in their tracks. These chokes are sure to be the go-to for any turkey hunter!

NOTES: Carlson's Turkey Choke Tubes can shoot steel shot no larger than #4.
TSS Turkey loads (sizes 7-10) may be used in all of our turkey chokes

WHITE WING DOVE CHOKE TUBES

The NEW White Wing Dove choke features Carlson's exclusive TST (Triple Shot Technology), which results in reduced pellet deformation, denser patterns, and fewer flyers. Our White Wing Dove choke is manufactured from 17-4 stainless steel and has been designed to produce the best patterns for dove hunters. For all ranges, when hunting doves, we guarantee the reliability and performance dove hunters want and deserve. Available in Decoy (LM), 15 to 35 yards, or Extended-Range (IM), 30 yards and beyond, all White Wing chokes are ported to help reduce recoil and muzzle jump. These chokes can handle steel, lead, Hevi-Shot, and TSS, as some public grounds stipulate shot composition. As always, we guarantee peak performance and user satisfaction.

Our Rooster XR choke tube is manufactured from 17-4 stainless steel and has been specifically designed to produce the best patterns when shooting Winchester's New Rooster XR ammunition. Featuring the new Shot-Lok™ Technology, these chokes produce the tightest patterns and highest downrange energy when compared to other game loads on the market. These chokes come in either Early Season (LM) or Late Season (IM) constrictions to accommodate nearly all hunting situations. Each choke is ported, allowing the gases to escape quickly and reducing recoil and muzzle jump in the process. We have designed these chokes to handle lead, steel, or Hevi-Shot so they can be used for either upland game or waterfowl hunting with great results.

TST
TRIPLE SHOT TECHNOLOGY

- Fewer flyers
- Denser patterns
- Reduced pellet deformation
- See page 3 for a cutaway of TST

PRAIRIE STORM™
CHOKE TUBES
Delivers Devastating Patterns
with Virtually Any Ammunition

The unique FLITECONTROL® wad in Prairie Storm™ Ammunition will deliver inconsistent patterns in ported chokes or when used with wad-stopping or stripping devices. This choke uses a special field-tested constriction and length to get the most from Federal Premium Prairie Storm™ Ammunition. Carlson's titanium-coated choke tube allows Federal's special FLITESTOPPER lead pellets and FLITECONTROL® wad to deliver devastating downrange patterns.

This choke performs equally well when used with lead, copper, nickel, Hevi-Shot, and steel shot loads. Carlson's Prairie Storm™ choke tube is a proven performer on pheasants and upland birds using all lead and steel shot loads over extended distances.

PLEASE NOTE: The EARLY SEASON choke tube is a LM constriction and the LATE SEASON choke tube is an IM constriction. All sizes and speeds of steel shot may be used in either choke tube. This choke is backed by Carlson's lifetime warranty.

3 GUN CHOKE TUBE SET

Carlson's 3-Gun Set is designed specifically for use in 3-Gun competitions. This 3-piece choke tube set allows the shooter to select the desired choke constriction needed at every stage. These chokes are laser-etched on the body and head for easy identification. The 3-Gun choke tubes are manufactured from heat-treated 17-4 stainless steel and extend 3/4" out from the end of your barrel. They are designed to shoot lead, steel, TSS, and Hevi-Shot loads. Our 3-Gun Choke Tube Set will also work in other target shooting and hunting situations.

Slugs may be used in the IC & LM choke tubes.
Slugs may NOT be used in the IM choke tube.

3 GUN CHOKE TUBE SETS (12 GA)		
Item#	Description	Price
16890	Remington	\$162.95

AUTO CATCHER For 12 & 20 GA Right-Handed Semi-Auto Shotguns

AUTO CATCHER		
Item#	Description	Price
00440	Auto Catcher (Right Hand Eject Only)	\$23.95
00441	Additional 2-Pack Adhesive	\$6.50

Carlson's 12 Gauge Auto Catcher is an all-steel shotgun shell catcher that prevents empty hulls from being ejected through the receiver opening on semi-automatic shotguns and holds the empty hulls for easy removal. One model works with most 12 & 20 gauge semi-automatic shotguns. Stop your hulls from distracting you or others at the range while keeping empties from hitting the ground. Simply peel off the double-faced tape (2 included with the auto catcher) and attach to the gun's receiver. The semi-permanent adhesive can be removed if desired. Softly padded tape acts like a barrier, keeping the metal plate away from the gun. There is no movement or vibration to scratch the receiver's finish. The Auto Catcher can be adjusted to fit different shotshell loads and guns where needed. Simply close or open the ends of the wire with no modifications to the gun.

TRAP PAK: THE COMPLETE TRAP SHOOTER SET

Carlson's exclusive TRAP PAK takes the guessing game out of trap shooting! This three-choke set with free case is easily identified with the appropriate shooting yardage lasered on the extended heads of the choke tubes. Carlson's exclusive offer includes a choke tube case to keep three choke tubes safe inside your shooting bag. Our Trap Pak is manufactured from 17-4 heat-treated stainless steel and designed to throw tighter and denser patterns than conventional choke tubes. These choke tubes feature a 25% longer parallel section in the choke, thus throwing more consistent patterns. Each choke tube is knurled on the end to allow for quick and easy removal. These choke tubes have the constriction and size laser-marked on the end and body for easy reference. Steel shot may be used through these choke tubes with exceptional results. Remember to pattern your shotgun choke tube with the specific shotshell load you are going to be using. Different brands of ammunition throw different patterns from the same choke tube.

16-Yard, 22-Yard, & 27-Yard Choke Tube Set

TRAP PAK INCLUDES THE FOLLOWING:

16-Yard choke tube with .020 constriction

- Works well from the 16 to 21 yard line while trap shooting
- Exceptional results out to 40 yards when hunting

22-Yard choke tube with .025 constriction

- Works well from the 22 to 26 yard line while trap shooting
- Exceptional results out to 50 yards when hunting

27-Yard choke tube with .030 constriction

- Works well from 27 yard line and beyond while trap shooting
- Exceptional results beyond 50 yards when hunting

Orange plastic 3-choke case

Do not shoot steel shot larger than BB or any steel loads faster than 1550 FPS through the 22 & 27-yard choke tube. Slugs, sabots, and rifled slugs are not to be used in any of these choke constrictions.

* No steel shot larger than #2 in 22 & 27-yard choke tube.

16-YARD TRAP CHOKE TUBE

Our 16-Yard Trap Choke is manufactured from 17-4 stainless steel and is designed to throw tighter and denser pattern over conventional flush choke tubes. These choke tubes feature a 25% longer parallel section in the choke, thus throwing more consistent patterns. Each choke tube is knurled on the end to allow for quick and easy removal. Each choke tube has the constriction and size laser-marked on the head and body for easy reference.

The 16-Yard Trap Choke is safe to shoot all Hevi-Shot, lead, steel, copper, TSS, and other non-toxic ammunition.

DO NOT shoot slugs, sabots, or rifled slugs through the 16-Yard Trap Choke.

PORTED SPORTING CLAY CHOKE TUBES

Our ported choke tubes help to reduce recoil and muzzle jump making your follow-up shots quicker while staying on target. Manufactured from 17-4 heat-treated stainless steel, these chokes are precision-machined with 25% longer parallel sections over flush choke tubes. The extended portion of the choke tube allows for quick and easy removal and insertion. Steel, lead, copper-plated, nickel, Hevi-shot, Bismuth, and tungsten may be shot through these choke tubes. When using steel shot do not shoot steel larger than BB or speeds faster than 1550fps through any choke tighter than full. These choke tubes are available in a matte black finish or in a titanium gold finish, which strengthens the tube while protecting it from corrosion. These chokes are backed with our lifetime warranty and made in the USA!

SPORTING CLAYS CHOKE TUBES

PATTERN TESTED. SHOOTER APPROVED.

Available in Stainless (silver) or Black Finish

NOTE: Hevi-Shot may be used with any of Carlson's Choke Tubes.

* If you are unsure which Benelli or Beretta choke system is in your shotgun, please refer to page 37 to help identify which style of choke your shotgun uses.

12 GAUGE SPORTING CLAYS CHOKE TUBES

Our Sporting Clays choke tubes are made from 17-4 heat-treated stainless steel and precision-machined to produce a choke tube that patterns better than standard choke tubes. These choke tubes feature a 25% longer parallel section in the choke, thus throwing more consistent patterns than conventional choke tubes. Extended choke tubes protect the end of your barrels and have knurling on the end to allow for quick and easy removal. Each choke tube has the constriction laser-marked on the end for easy reference. Lead, copper-plated, nickel, Hevi-Shot™, Bismuth, tungsten or steel shot may be used in these choke tubes. These choke tubes are backed by our Lifetime Warranty.

20 GA SPORTING CLAYS CHOKE TUBES

Sporting clay choke tubes are made from 17-4 stainless steel and are precision-machined to produce a choke tube that patterns better than flush-mount choke tubes. These choke tubes feature a 25% longer parallel section in the choke thus throwing more consistent patterns than conventional choke tubes. Lead, copper-plated, nickel, Hevi-Shot™, Bismuth, tungsten, or steel shot may be used in these choke tubes. For best results, pattern your choke tube with the specific shotshell load you will be using in the field. Different ammunition patterns differently from the same choke tube.

CARLSON'S COYOTE CHOKE

This choke is for use with Hevi-Shot, Bismuth, and lead. This high-performance choke tube has been specifically designed for the coyote hunter to deliver devastating downrange patterns upwards of 70 yards when shooting larger shot sizes. Produces very dense patterns with T-shot, #4 buck, and BB predator loads. Great for turkey and predator hunting.

NOT FOR USE WITH STEEL SHOT LARGER THAN #4 OR SLUGS.

40071	Benelli Crio/Crio Plus	\$80.95

These precision Rifled Choke Tubes are manufactured from 17-4 heat-treated stainless steel. Each choke tube protrudes .625 to 1.3 inches from the end of the barrel depending on which type of firearm the choke tube has been specifically designed for (see type chart). Each choke tube has a right-hand rifle twist, which is 1 in 35. Each choke tube has a groove diameter of .730 of an inch in 12ga. These choke tubes have a matte black finish and carry a lifetime warranty. If you're looking for improved accuracy from a smooth bore barrel, these fine choke tubes will improve your groups. Works with slugs, rifled slugs, and sabots.

DESIGNED TO PERFORM. BUILT TO LAST.

CARLSON'S PORTED BUCKSHOT CHOKE TUBES

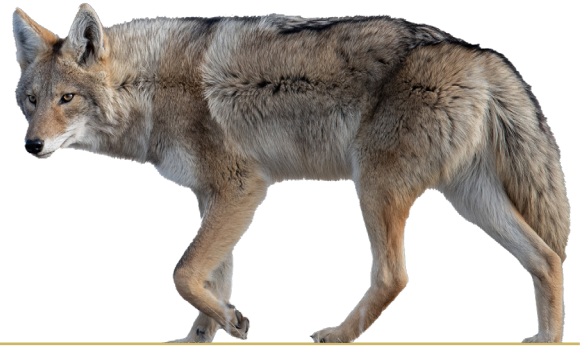

DENSE PATTERNS WITH 00 & 000 BUCKSHOT!

Our Ported Buckshot choke tube is designed to give you tight patterns downrange with 00 & 000 buckshot. This choke is ported to reduce the recoil and muzzle jump that tend to go hand in hand with these large loads. This choke features a constriction designed specifically to optimize patterns with large and small loads alike. This choke will extend about 1" out of the barrel and has a black finish. Machined out of 17-4 heat-treated material, this choke can be used with lead, steel, and Hevi-Shot loads. NOT TO BE USED WITH SLUGS.

CARLSON'S TACTICAL MUZZLE BRAKE

\$146⁵⁰

The Carlson's Tactical Muzzle Brake choke tube features a porting designed to reduce recoil significantly. This new choke tube is manufactured from 17-4 heat-treated stainless steel in your choice of either Cylinder or Extra Full constriction. The Cylinder Choke Tube may be used with ALL shotshells including lead, steel, Hevi-Shot, and even slugs! The Extra Full choke tube can be used with all Hevi-Shot and lead loads (but is not to be used with slugs and cannot be used with any steel shot larger than #2 or with any Steel shot faster than 1550FPS). The Extra Full constriction is also an excellent choice for hunters using larger shot sizes for coyotes, wild hogs, or deer. Turkey constrictions are not to be used with any steel shot larger than #4. Due to choke head size, won't fit SXS or O/U firearms.

CARLSON'S TACTICAL BREECHER MUZZLE BRAKE

\$157⁵⁰

The Carlson's Tactical Breecher Muzzle Brake Choke Tube has a head that extends approximately 2.75" beyond the end of the barrel and features a matte black finish. The addition of this new choke will not only make any ordinary shotgun look extraordinary, but it also significantly reduces recoil, allowing for better control of your firearm and quicker follow-up shots. Perfect for law enforcement or home defense. These chokes are proudly made in the USA and feature Carlson's lifetime warranty! Due to choke head size, won't fit SXS or O/U firearms.

UNIVERSAL SHOTGUN PLUG 2-PACK

Our universal shotgun plug kit allows you to easily decrease the shell capacity from 4 rounds in the magazine tube down to 2 rounds on most shotguns. The plug can be used without cutting but can easily be trimmed to length for other popular guns. Trimming the universal plug to length is best accomplished with a handheld set of pruning shears, PVC pipe shears, or a hacksaw. Always start with the full plug and cut 1/4" to 1/2" off at a time until only 2 rounds fit in the magazine tube. (For fitting purposes, use the largest shell the shotgun is rated for.)

Add firepower to your favorite shotgun. These magazine extensions are constructed of blued solid steel and most come with spring, base clamp, and a high-visibility follower. The threaded tube replaces your magazine cap and gives you the ability to add extra rounds to your magazine. Easy-to-follow instructions are included. Our magazine extensions are great for home protection, competition shooting, and law enforcement. See chart for the make/model and the magazine capacity.

NOTE: 12 ga. Remington 870 will also fit 16ga models. Remington extensions do not fit 870 TACTICAL or special purpose models.

Performance Worth the Price

NOTE:
Remington barrels will not fit Remington 870 TACTICAL or special purpose models.

FEATURING CHROME-LINED BORES

Carlson's high-quality barrels are made for Remington 870® and Benelli® Supernova and Nova® models. All barrels are constructed from certified ordinance grade 4140 steel with chrome-lined bores. Vent rib models have a satin matte blue finish with red fluorescent front sight and brass center bead.

All 18½" barrels have either ramped front sights or adjustable rifle sights with a satin matte finish. Each barrel comes with a Carlson's choke tube installed. These chokes are manufactured from 17-4 stainless steel. Enhance the versatility and performance of your shotgun with a Carlson's replacement shotgun barrel.

SPORTING CLAYS EXTENDED CHOKE TUBES

Sporting Clay Choke Tubes are made from 17-4 stainless steel and are precision-machined to produce a choke tube that patterns better than standard choke tubes. These choke tubes feature a 25% longer parallel section in the choke thus throwing more consistent patterns than conventional choke tubes. Lead, copper-plated, nickel, Hevi-Shot™, Bismuth, tungsten, or steel shot may be used in these choke tubes. Steel shot larger than BB or speeds faster than 1550fps should not be used in any choke tighter than full.

EXTENDED TURKEY CHOKE TUBES

These chokes extend approximately 1" from the end of the barrel. They are manufactured from 17-4 heat-treated stainless steel and have a matte black finish. Our Extended Turkey Choke Tubes feature a 1.050" parallel section to produce the optimum pattern with your shotgun. Lead, copper-plated, nickel, Hevi-Shot™, or Bismuth may be used in these choke tubes. We have found our .660 Extended Turkey Choke to produce the most consistent patterns with turkey loads.

DON'T SKIMP ON MAINTENANCE AND CLEANING

MAINTENANCE IS
CRITICAL. KEEP
YOUR FIREARMS
AND CHOKE TUBES
IN TOP CONDITION.

CARLSON'S CHOKE TUBE CLEANER & CARBON CUTTER
Carlson's Choke Tube Cleaner & Carbon Cutter is nonflammable, nonhazardous and biodegradable. It provides you with a safe and effective way to clean carbon and plastic wad fouling from choke tubes and all of those semiautomatic shotguns' gas system parts. This product also works well to clean AR-15 and other rifle bolt assemblies. Completes the job in 15 minutes or less! Supplied in a 7oz jar.

Choke Tube Cleaner#06611 **\$16⁵⁰**

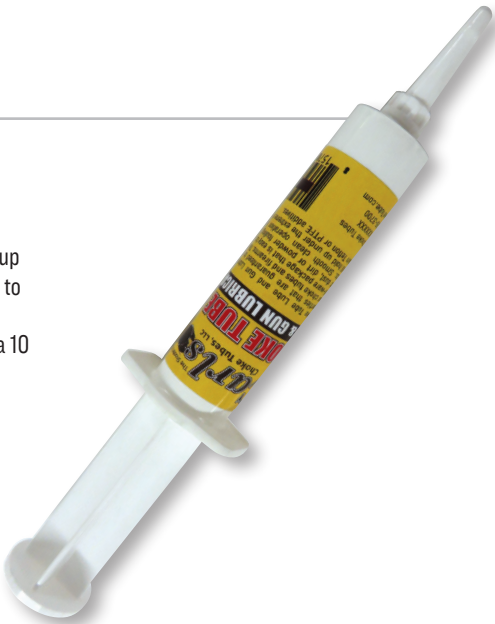

CHOKE TUBE LUBE
Choke Tube & Breech Plug grease is a synthetic-based lubricant that is able to withstand the high temperatures of your shotgun. Applying a small amount Choke Tube & Breech Plug grease to your choke tube will ease cleaning, reduce wear, and prevent your choke tubes from seizing with steel shot loads, heavy buffered turkey loads, or with repeated shooting. Choke Tube & Breech Plug grease comes in a .65 oz. tube with handy applicator tip.

Choke Tube Lube.....#06610 **\$9⁵⁰**

CARLSON'S CHOKE TUBE LUBE SYRINGE
Carlson's Choke Tube Lube is excellent for use on all choke tubes. Also works great on full-auto locking lugs, sears, bolts, and slide/rails. Smooth and clean operation in the severe cold (-100°F) and will hold up under extreme heat (+750°F) as well. This lube offers extreme pressure properties that are guaranteed to reduce friction and wear on weapons and choke tubes. This product will not attract dust, dirt, or powder fouling like most petroleum-based products and does not contain Teflon or PTFE additives. Supplied in a 10 ml syringe.

Choke Tube Lube Syringe#06612 **\$13⁵⁰**

CARLSON'S ALUMINUM SNAP CAPS — RIFLES & PISTOLS

- Spring-loaded striking area cushions and protects firing pins
- Won't damage your extractor or break off pieces in the barrel like most manufacturers' snap caps
- Helps eliminate flinching while shooting
- Use for sight alignment & dry-firing practice
- Protects the firing pin (spring-loaded cushion)
- Manufactured to SAAMI specs using aluminum
- Advanced malfunction clearing drills

NOTE: 17 HMR & .22 Rimfire do not use spring cushions.

SPORTING CLAYS SPEED WRENCH

Our fastest choke wrench allows you to remove and insert chokes in just seconds. They are easy to operate using only your index finger and thumb. Simply tighten the black thumb knob on the end of the wrench, and the choke can be easily removed or inserted. Works great in the field, on your bench, or in any situation when you need to get your choke tubes out quickly. Lifetime Warranty.

UNIVERSAL CHOKE WRENCH

By far our best-selling choke wrench. This simple, yet tough, wrench will remove any choke with a slotted end. Made of heat-treated stainless steel this wrench will not bend. Will fit 12ga., 20ga., 16ga., 10ga., and 28ga. choke systems with notches.

"T" HANDLE SPEED WRENCH

Our best wrench to give you more leverage to remove those hard-to-get-out choke tubes. These wrenches will remove most choke tubes with slotted ends.

12ga "T" Handle wrench won't fit chokes tighter than .665"

Item #	Description	Price
#00073	Hunters Locking Swivels	\$16.50

BERETTA & BENELLI CHOKE SYSTEM IDENTIFICATION

By using the photos shown below, you should be able to easily identify which Beretta/Benelli Choke Tube system your firearm utilizes.

Pic A) Standard Beretta/Benelli (Ber/Ben) Mobil Choke:

It can be identified by measuring a flush-mount choke tube. The flush-mount chokes in this system are 2" long and have threads located at the muzzle end of the choke (top of choke where choke notches are).

Pic B) Beretta Optima Plus/Benelli Crio/Crio Plus:

Identified by measuring a flush-mount choke tube. This choke system is 2-3/4" long and the threads begin 3/4" from the muzzle end of the choke. These two chokes have identical outside dimensions, however these chokes are based on two different bore diameters and should not be interchanged.

Pic C) Beretta Optima/Benelli Crio:

It can be identified by measuring a flush-mount choke tube. It is 2-3/4" long and threads are located at the muzzle end of the choke (top of choke where choke notches are). The Benelli Crio was in very few guns and is no longer being put into shotguns. Once again, these two chokes have the same outside dimensions but are based on different bore diameters and should not be interchanged.

Pic D) Beretta Optima HP:

It can be identified by measuring a flush-mount choke tube. It is 2-3/4" long and the threads begin about a half-inch down from the top of the choke. This is a new choke system that you find in the A-400 Xplor shotguns.

***NOTE:** Please measure flush-mount choke tubes or only the portion inside the barrel. The images above are extended choke tubes.

6 BENEFITS OF EXTENDED CHOKE TUBES

1. LONGER PARALLEL OR CHOKE SECTION:

By extending the choke, you create a longer parallel or choke section, which will throw tighter and more dense patterns, thus more pellets where they need to be. This is the biggest plus: You simply get better patterns.

2. BARREL PROTECTION:

The extended part of the choke protects the end of your barrel from damage.

3. QUICK REMOVAL & INSTALLATION:

Extended chokes can be removed with your fingers, allowing you to get them in and out of the shotgun quickly.

4. EASY IDENTIFICATION:

Laser-etched for quick reference so you know what constriction is in your shotgun.

5. EASY TO REMOVE IF THERE'S EVER A PROBLEM:

In the event of a choke getting stuck due to maintenance issues (rust) or damage, you have an extended portion of the choke outside of the barrel that allows removal to be much easier. General care (grease on threads) and inspection will help prevent this.

6. LESS PLASTIC BUILDUP:

We see less plastic buildup in the entrances of choke tubes when they are

extended since the taper section to the constriction or choke section is more gradual. Flush-mount chokes in more open constrictions (Cylinder through Improved Cylinder) will throw similar patterns to their extended counterparts. The biggest difference comes into play in tighter chokes, heavy loads, field shotshells, steel shot, and turkey shotshells.

Price subject to change.
